

Swiss Perfection

GOMINA
SWISS QUALITY

Swiss Precision

Since the founding of Gomina AG in 1974, we have made it our business to be precise. Since then, we've become a leader in the production of micro-mechanical precision components. Precision that is used around the world in medical technology, the automotive industry and sensor technology. Precision not for its own sake, but to satisfy the requirements of our customers.

SWISS QUALITY

Swiss Quality

Precision is inseparably linked with another fundamental value – quality.

Gomina has had ISO certification since 1991, and today possesses ISO 9001:2000 and I3485:2003 certifications. These marks of quality are founded on our employees' in-depth technical knowledge, their many years of experience and their ongoing training. High-tech industrial products from the Swiss Alps – the highest in quality and precision.

GOMINA
SWISS QUALITY

Swiss Reliability

Precision, quality and reliability are the central themes running through our entire production process. Our highly efficient machine facilities make us an ideal partner for the manufacture of precision saw blades and micro-mechanical components for medical and sensor technologies. Everything from the mechanical processing right through to the delivery of parts in sterile packaging are produced in our production plant. All this combined with years of experience, know-how and a dedicated team of qualified craftsmen makes Gomina a leader in its field.
